

CUT 22 M

Product code: 265401701

Multifunctional Cutting Fluid

This product has been formulated from hydro treated base oils fortified with specially EP additives. It does not contain chlorine or heavy metals.

Benefits & Advantages

- Multifunctional fluid (processing and hydraulic)
- Non toxic
- Free of chlorine and heavy metals
- Good flushing, cooling and lubrication properties
- Improved tool life and surface finishing
- Low volatility
- Colourless
- Odourless

This product has been designed for multifunctional purposes, for machining applications where the highest quality surface is required and also to be used in hydraulic systems (HLP type according to DIN 51524/2). It is suitable for turning, milling, tapping and treading. Suitable for all type of materials: Steel, cast iron, brass, bronze, copper and aluminium.

Typical Performance Data

Typical	Value
Colour	Colourless
Density @ 20 °C, gr/ml	0.83
Viscosity @ 40 °C, cSt	18-23
Flash point, °C	210
Pour point, °C	-15
Copper Corrosion	None

All performance data on this Technical Data Sheet are indicative only and can vary during production.
