

CUT BIO A

Product code: 265402901

Fully synthetic neat cutting oil

This product is a synthetic oil of high chemical stability and good oxidation resistance. It is recommended for metal machining operations where performance is required and does not contain chlorine compounds and due to its nature, the product is readily biodegradable.

Benefits & Advantages

- Good flushing, cooling and lubricating properties
- High productivity
- Improved tool life and surface finish
- Anti-wear performance
- Biodegradable
- Low volatility

Applications

It is suitable for use in all type of materials as steel, copper, brass, bronze and aluminum. Suitable for machining operations such as turning, drawing, grinding, sharpening and tapping.

Typical Performance Data

Typical	Value
Colour	Clear amber
Viscosity @ 40 °C, cSt	12
Viscosity index	150
Density @ 20 °C, gr/ml	0.91
Flash point, °C	200
Pour point, °C	-10

All performance data on this Technical Data Sheet are indicative only and can vary during production.
